Ladies, in your devotional time establish a routine of saying the memory verses you've learned in 2023. Whether you say them all each day, or rotate saying three to six a day every other day or so. This will help you maintain them in your memory. Also be sure to be able to explain what each scripture means so that you will be able to use it effectively in spiritual warfare as well as in biblical conversations. You should learn all scriptures from the **KJV** so that when we recite them together we will be saying the same thing.
